Summary

Fourth-year Information and Communication Technology student at Sripatum University (GPA: 4.00) seeking an entry-level position as a Software Tester (QA), Frontend Developer, or Junior Data Analyst. Experienced in manual functional testing, UI/UX layout inspection, and cross-browser verification, alongside practical work drafting test scenarios, executing test cases, and documenting structured bug reports. Combines hands-on web development skills (HTML5, CSS3, Bootstrap) and app prototyping (Figma, AppSheet) with foundational data querying (SQL, Google Sheets) and basic test automation using Python scripts. Detail-oriented, methodical in defect identification, and motivated to ensure high software quality, clean interfaces, and data accuracy across cross-functional teams.

Education

Sripatum University

Bachelor of Science, Information and Communication Technology

Bangkok, Thailand
2023 - Present

- GPA: 4.00 / 4.00

Wachiratham Sathit School

High School Diploma, Science-Mathematics

Bangkok, Thailand
2020 - 2023

- GPA: 3.87 / 4.00
- Class President: Managed classroom logistics, coordinated schedules, and facilitated student-faculty communication.

Projects

DekHor - Dorm Guide Website | Web Development & Manual Testing

- Gathered student living requirements and designed user-friendly layouts based on student survival guide needs.
- Built web pages using HTML and CSS, adjusting layouts to display properly on mobile and desktop screens.
- Performed manual UI and navigation checks to find and fix broken links, misaligned text, and layout issues.

ToDoList-QA & Coffee Ordering | Software Testing & QA

- Executed manual functional test cases to verify user workflows, input limits, and button actions.
- Ran simple automated smoke check scripts using Python (Requests & BeautifulSoup) to verify web page status.
- Documented structured bug reports detailing steps to reproduce, expected results, and actual outcomes (e.g., delete button failures and data loss on refresh).

LittleKids – Early Learning App | App Development & Data Organization

- Created a 3-language learning app (Thai, English, Chinese) with 6 educational categories using AppSheet.
- Designed clear screen navigation and large, kid-friendly buttons for easy interaction.
- Organized and maintained learning materials, toy catalogs, and video links in structured Google Sheets tables.

ShareU – Campus Rental Platform | UX/UI Design & System Flow

- Mapped out user flows for item borrowing on campus, including login, item search, calendar booking, and deposit confirmation.
- Created interactive prototypes using Canva and Figma to simulate complete user journeys.
- Collected feedback from 8 classmates to improve layout clarity and button placement.

Work Experience

Cover Risk (Thailand) Co., Ltd.

Bangkok, Thailand

Part-time Operations Officer

December 2025 – January 2026

- Verified and prepared insurance claim documents, ensuring data accuracy before extracting information from internal systems into structured summary reports.
- Coordinated with insurance representatives to follow up on missing details and resolve initial documentation errors, ensuring smooth day-to-day operations.

Skills

Technical Skills

- Testing Basics: Manual Testing, Functional Testing, UI & Layout Testing, Usability Check, Basic Defect Reporting
- **Web & Database:** HTML5, CSS3, Basic Responsive Design, SQL (Basic Data Queries)
- **Tools & Platforms:** Figma (UI Inspection), VS Code, Git/GitHub (Basic), n8n (API & Data Flow), AppSheet, Basic 3D Modeling

Soft Skills

- Attention to Detail: Careful with UI layouts, data accuracy, and verifying requirements against actual results.
- Teamwork & Communication: Works well in team settings, open to feedback, and reports issues clearly.
- Fast & Willing Learner: Enthusiastic about learning new testing tools, test case writing, and quality assurance best practices.

Language

- Thai: Native
- English: Basic
